

Kids' Science Club

Autumn 2022

Free gift for all students who order!

Architectural Engineering STEM Experiment Kit

Build more than 20 models of structural elements and real-world buildings. Start with basic structures like trusses, arches, and domes, and move on to scaled-down models of real-world buildings. Ages 8-14.

CST-585 \$45.95

HyperTiles Deluxe Pack

What can you build with this hyperbolic paraboloid? HyperTiles are fun, super-versatile shapes that can be linked together in an infinite number of combinations to create amazing designs! Ages 5+.

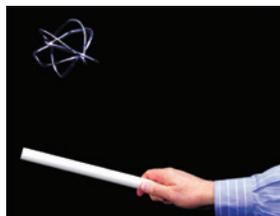

CST-725 \$34.95

Doctor Livingston Jr. Human Body Puzzle for Kids

Assemble a 4 foot tall, accurate cross-cut of the entire human body, from cranium to fingertips! 100 pieces.

PUZ-245 \$24.95

Brite Star Tinsel - Levitating Orb

Create your own static electricity activity! Knot several strands of Brite Star Tinsel on both ends, grab a PVC pipe, a latex balloon, or a wiffle ball bat to charge your orb, and you're ready to go! Each package comes with 1,000 strands, so one package will last for years!

VAN-260 \$1.95

Mystery Marbles

Three glass marbles in a liquid filled tube. What's so special about that? Well, no matter which way you turn or tilt the tube, the three marbles will move together but they never touch... This is a great brain teaser, but what's the trick?

OPT-225 \$5.95

Ultraviolet Color-Changing Nail Polish

Watch as this UV nail polish changes color in the sun! When the UV Nail Polish is removed from sunlight, it returns to its original color! Comes in two different colors!

NP-540 Silver Glitter to Gold \$6.95
NP-560 Pink Pearl to Cranberry \$6.95

No UV light

In UV light

NOTE: We recommend more than one coat.

Mirascope Mini

How does it work?

Project a real image on top of the Mirascope that you can put your finger through. Using two concave, parabolic mirrors, a small object placed on the bottom appears to be floating as if real. A finger can pass right through it! Trick your family and friends!

MIR-135 \$8.95

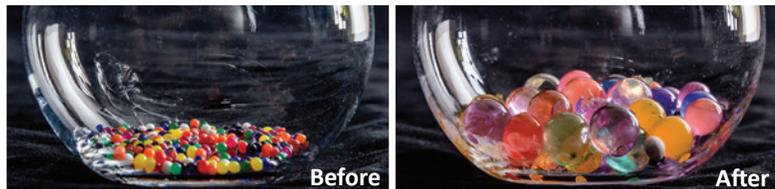

Magic Crystal Tree

The branches of your tree will begin to bloom with colorful crystals in just minutes, then watch as they continue to grow for hours. Tree measures 4" tall. Colors may vary. Ages 6+.

CRY-200 \$3.95

A super hit!

Water Marbles

These colorful water marbles start small, but grow up to 100 times their weight in water to become slippery, jelly marbles that are tons of fun. Marbles come in a 5.5" plastic test tube. Ages 5+.

GB-260 \$4.95 / 1.8 oz

Large Gro-Beast Dinosaurs 6-Pack

When dry, these six little dinosaurs will all fit easily in the palm of your hand...but when placed in water, they grow to many times their original size. Ages 5+.

GB-106 \$6.95

Polymer Snow Tube

Make your own instant fluffy snow! Just add water and watch it grow! Comes in a 5.5" plastic test tube. About 17 g. Ages 5+.

GB-270 \$4.95

Hands-On Favorite!

Tornado Tube

Make your own tornado in a bottle. Show that in order for water to flow down, air must flow up. Add glitter or toy houses! Colors may vary. For ages 4+. Plastic bottles not included.

SS-1 \$1.95 each

Balloon Helicopter

Great for outdoor fun! Fly your helicopter over 20 feet high. Blow up the balloon again to relaunch.

AIR-610 \$1.95

Surprising Science for Kids: Magic? No, It's Science!

Ever see a magician perform a seemingly impossible feat? Many times the "magic" you're watching is really just science in action. Create a snow avalanche in your kitchen! Make paper disappear while the inked words remain behind! Bend a wire and UN-bend it with nothing but water, and more! For grades 3-6.

KIT-540 \$25.95

Tint your slime with food coloring!

Make Your Own Slime!

Make your own perfect batch of clear slime! Ages 5+.

SL-1 \$3.95

Super Cool Slime

We all know that slime is cool, but this slime is REALLY cool - literally! You can have your own container of non-Newtonian fluid! Comes in assorted colors. Non-toxic. ≈3 fl. oz.

SL-500 \$3.95 each

A Science Fair Classic!

Volcano Making Kit

Build your own volcano and watch as it erupts with bubbling, fizzing "lava". Kit includes fast drying plaster, volcano mold, paint, paint brush, and stir stick. Requires baking soda and vinegar for eruption (not included). 8 yrs+.

GRN-435 \$11.95

Do you want to build a snowman?

Melting Snowman

Build a snowman out of the snow-white putty and the included plastic accessories; then wait as he melts into a puddle of goo. This silicone-based bouncing putty has properties of a solid as well as a liquid, and it will slowly ooze to take the shape of its container. The good news is that it can be rebuilt into a snowman over and over again, without the risk of frostbite! 50 g of putty.

PUT-300 \$8.95 each

A Science Fair Classic!

Volcano Making Kit

Build your own volcano and watch as it erupts with bubbling, fizzing "lava". Kit includes fast drying plaster, volcano mold, paint, paint brush, and stir stick. Requires baking soda and vinegar for eruption (not included). 8 yrs+.

GRN-435 \$11.95

Do you want to build a snowman?

Melting Snowman

Build a snowman out of the snow-white putty and the included plastic accessories; then wait as he melts into a puddle of goo. This silicone-based bouncing putty has properties of a solid as well as a liquid, and it will slowly ooze to take the shape of its container. The good news is that it can be rebuilt into a snowman over and over again, without the risk of frostbite! 50 g of putty.

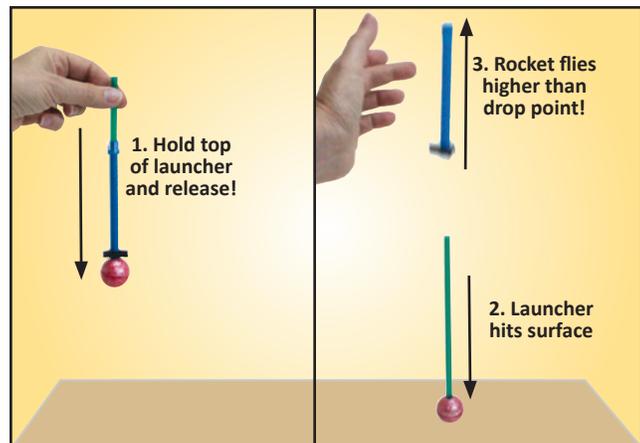

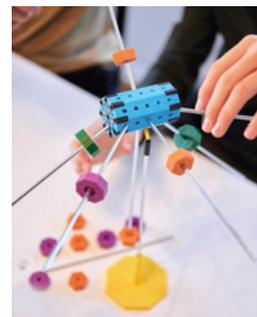

PUT-300 \$8.95 each

Primary Octacog Set

Octacog is a game that defies gravity: Challenge friends and family to a game of balance. Take your turn by adding or moving a piece. Then give it a spin. If Octacog stays balanced, you're safe and it's the next player's turn. Ages 7+.

CTR-300 \$39.95

Reaction Rocket

Hold the top of the launcher and drop it straight down onto a hard surface. The rocket shoots up dramatically higher than its original drop height proving Newton's 3rd Law of Motion! Comes with one launcher and two rockets.

RKT-625 \$2.95 each

Small Balancing Bird

These colorful birds balance on anything - your finger, a pencil point... The center of mass or center of gravity is designed to be beneath the tip of the beak. ≈3" wingspan. Colors may vary.

CTR-250 \$1.50 each

A mega-seller!

Wind Gyro

You can spin this top with your fingers... or you can rely on science and use your breath! Approx 4 cm (1.5") tall.

TOP-380 \$6.95
