

## Teacher Master Order Form Holidays 2018

Dear Teacher,

Welcome to our elementary Kids' Science Club! With this free, no-obligation program, your students will improve their science literacy skills and involve their parents in the learning process. Throughout the school year, you'll get a packet of colorful fliers filled with simple, fun science goodies that your students can purchase and enjoy at home.

The products in this flier are designed to encourage your students' interest in science in a safe, entertaining way.

Your entire class reaps the benefits! You'll get:

- A FREE gift for every participating student!
- Extra Credit Points for the total purchase, which you can redeem to get FREE science materials for your classroom!
- FREE shipping for your order over \$40! Orders under \$40 - \$7.95 shipping.

### Here's how it works:

1. Send home the student fliers with the due date that works best for you. We suggest giving families at least one week to review.

You may also wish to send home copies of the personalized letter (see back), indicating how checks should be written.

2. After your students return their order forms and payments, compile your class order on the Master Order Form at right.

3. There are four ways to place an order:

- **Online:** Place your class order at [www.educationalinnovations.com/kidsclub-holidays18](http://www.educationalinnovations.com/kidsclub-holidays18).
- **Phone:** Call (203) 748-3224 and mention "Kids' Science Club." We are here Monday-Friday, 9-5 Eastern Time.
- **Mail:** Mail your order with checks or money orders payable to Educational Innovations. Please do not send cash. Mail to:

5 Francis J. Clarke Circle  
Bethel, CT 06801 U.S.A.

- **Fax:** Fax us at (203) 229-0740.  
We accept all major credit cards.

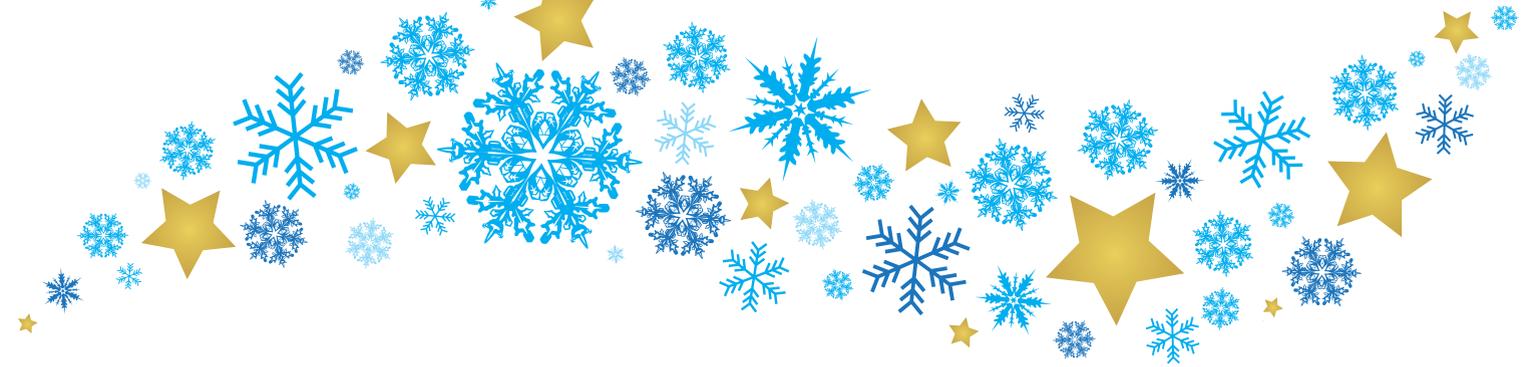

Item No.	Description	Qty	Price	= Total \$

Dear families,

Our class is participating in Educational Innovations' Kids' Science Club. It's a wonderful way to "bring science home." With every order, we earn free points that can be used to bring even more hands-on science into our classroom.

There are so many benefits to fostering a love of science in young children! It gives them a head start on the essential STEM (Science, Technology, Engineering, and Math) skills they'll need in school, in life, and even in the workplaces of the future.

Plus, it's just a lot of fun!

Please take a moment to explore the science toys and experiments in this flier. If you'd like to order something for your child, simply fill out the form on the back page and return it with your payment (cash or check made out to \_\_\_\_\_). Please note the due date for all orders.

Thank you for your continued support in helping me make your child's education meaningful and successful. Please let me know if you have any questions or need help with your order. Happy browsing!

Sincerely,

Reminder: If you order any of the Home Science Lab subscriptions, please provide the name(s) and shipping address(es) of the recipient(s). All other materials will be sent to our school.
